Smart technology for smart workplaces with advanced document digitisation

The RICOH SD Series represents the latest advancement in Ricoh's renowned A3 colour intelligent device line up, incorporating state-of-the-art scanning technology.

Featuring a straight paper path, these multi-function devices enhance productivity and is adept at managing delicate or mixed media, making it suitable for high-volume scanning applications. With comprehensive security measures, energy efficiency, and broad workflow compatibility, the RICOH SD Series goes beyond traditional scanning. It is uniquely positioned to connect the scanner, printer, and workflow into one intelligent ecosystem. By linking the capture of physical documents (scanning), the distribution of information (printer), and the automation of processes (workflow), it transforms everyday document handling into a strategic enabler of productivity and compliance. This seamless integration makes life easier for end users by reducing errors, improving employee satisfaction, and ensuring a less complex, more efficient working environment.

Unlock productivity with intelligent scanning with Ricoh's intelligent devices

Protect what matters most

Preserve fragile or valuable originals with confidence. The straight paper path minimises jams and damage, ensuring safe and smooth scanning every time.

Built-in security you can trust

Keep your data safe with enterprise-grade protection:

- **TPM 2.0 (Trusted Platform Module)** encrypts sensitive information and secures device integrity
- Enhanced privileged account control ensures only authorised users can access critical functions
- **RICOH Always Current Technology** ensures your device stays protected with the latest security updates automatically.

Streamline your digital workflows

Simplify how you manage documents. The RICOH SD Series integrates seamlessly with cloud platforms and process automation tools to automate repetitive tasks, reduce manual handling and boost productivity across your organisation, driving cost efficiency and reducing risks.

Save time with effortless scanning

Speed up your workflow with Ricoh's SD Series new automatic scan feeder. No more scanning one page at a time – digitise multiple documents quickly and easily.

Next-level scanning: Unlock a smoother workflow

Versatile media scanning

The feeder scans various items – IDs, receipts, papers, envelopes, folded or bound originals – and automatically adjusts for size, skew and orientation differences.

Smart Operation Panel (SOP)

Preview your scanned documents right on the 10.1" Smart Operation Panel and proof before printing or sending, saving time and reducing waste.

Sustainability that works for you and the planet

The RICOH SD Series is designed with sustainability at its core, helping your organisation reduce its environmental impact without compromising performance:

Eco-friendly materials – PET toner bottles are made from 100% recycled plastic and the outer mainframe incorporates up to 46% post-consumer recycled material

Energy-efficient design – enjoy significant energy savings with low-melt toner technology and reduced fusing temperatures. The devices also feature low power consumption in Energy Saver Mode and low Typical Energy Consumption (TEC) values

Minimised waste – a hard toner lock ensures the toner bottle cannot be removed until it's completely empty – helping reduce toner waste and save on costs

RICOH Carbon Balanced Service – reduce your environmental impact by measuring, reducing and offsetting carbon emissions

Ricoh solutions to elevate your workplace experience

The RICOH SD Series is a powerful digitisation hub, enabling seamless integration with a wide range of solutions. It simplifies the automation of document capture, routing, indexing, and approval workflows, while integrating effortlessly with Microsoft and other leading platforms:

RICOH CloudStream is a secure, cloud-based print management solution that enables users to print seamlessly from anywhere while maintaining control, visibility and efficiency across their print environment.

RICOH Smart Integration (RSI) connects scanned documents directly to cloud apps like SharePoint, Google Drive and more, improving operational efficiency across your organisation.

Leverage the RICOH SD Series advanced performance for scanning all types of documents, in combination with Ricoh's **AI-powered Intelligent Document Processing platform**, to accelerate business processes with automated data capture, classification, routing, indexing and approval.

Ricoh's difference

Ricoh goes beyond traditional print by combining cutting-edge technology with deep expertise in workflow optimisation. Our intelligent devices are designed not only to deliver exceptional print quality but also to seamlessly integrate with digital systems, enabling smarter, faster document management. With a strong focus on sustainability, security and user-centric design, Ricoh empowers organisations to streamline operations, reduce costs and confidently transition towards fully digital workplaces.
